

DÜMMEN
ORANGE®

Poinsettia

2023

Bringing ornamentals into the era of predictive breeding

Horticultural breeding is transitioning from conventional to predictive breeding and Dümmer Orange® is the driving force behind this. Our Breeding Technology Centre in the Netherlands is the largest horticultural breeding laboratory in the world. A high-tech home for international pioneering scientists, breeders and specialists to set new standards in flower and plant genetics and breeding excellence.

Moving away from relying on conventional processes to develop flower and plant varieties, predictive breeding is using large data-sets on plant

performance and a high-end IT infrastructure to achieve breeding goals faster and more reliably. Technology-driven breeding will allow the ornamental industry to become more sustainable, by using state-of-the-art breeding tools to develop novel resistance traits.

We believe in the power of innovation and lead the way in the use of modern breeding tools and prediction software for faster creation of high-impact varieties. We assure you get the best, and better every time.

nano[®] BRACT

EN nanoBract varieties feature a large number of medium sized, closed bracts displayed on the top of the plants; they are easier to transport, stand up well to retail conditions, and offer strong colour even under artificial lighting.

DE nanoBract Sorten verfügen über eine große Anzahl an mittelgroßen, geschlossenen Brakteen, die sich oben auf der Pflanze zeigen. Sie sind einfacher zu transportieren, halten sich gut unter Verkaufsbedingungen und zeigen ihre starken, satten Farben sogar unter künstlichem Licht.

NL nanoBract rassen hebben een groot aantal middelgrote, gesloten bracteen aan de bovenkant van de plant. Ze zijn gemakkelijker te transporteren, houden goed stand tijdens de verkoop en tonen hun sterke, rijke kleuren, zelfs bij kunstlicht.

FR Les variétés nanoBract se caractérisent par un grand nombre de bractées de taille moyenne couvrant densément le dessus de la plante, une résistance supérieure dans le transport et sur les étalages de vente, ainsi qu'une couleur très intense, même sous un éclairage artificiel.

IT Le varietà nanobracts presentano un gran numero di brattee compatte disposte in cima alle piante, sono più facili da trasportare e si mantengono ben erette nelle condizioni del punto vendita, e offrono un notevole effetto di colore anche sotto la luce artificiale.

ES Las variedades NanoBract se caracterizan por un gran número de brácteas agrupadas de tamaño medio dispuestas en la parte superior de las plantas. Son fáciles de transportar, se mantienen firmes en los puntos de venta y ofrecen un color intenso incluso bajo iluminación artificial.

Many, compact, closed bracts /

Varieties that can be grown at low temperature and perform well under colder environment in behalf of timing, bract colour, growth and botrytis resistance.

Sorten, die mit niedrigen Temperaturen kultiviert werden können. Die niedrige Temperatur hat hier keinen negativen Einfluss auf Verkaufszeitpunkt, Brakteenfarbe, Wuchs und Botritis-Empfindlichkeit.

Rassen welke geteelt kunnen worden bij lage temperatuur en goed presteren in een koude omgeving inzake reactie tijd, bracteen kleur, groei en resistentie tegen botrytis.

Variétés qui peuvent être cultivées avec de basses températures et ont une excellente performance dans un environnement froid tant pour le temps de culture, la couleur des bractées, la croissance et la résistance aux botrytis.

Varietà che possono essere coltivate a bassa temperatura ed hanno una buona performance in base alla fioritura, al colore della brattea, alla crescita e alla resistenza della botrite.

Variedades que se pueden cultivar a temperaturas bajas y que en entorno más frío mantienen un buen comportamiento en cuanto a precocidad, color de la bráctea, crecimiento y resistencia a botrytis.

The background is a solid teal color. Scattered around the edges and corners are several poinsettia flowers in various colors: bright red, pure white, and pale yellow. Some flowers are in sharp focus, while others are blurred, creating a sense of depth. The central text is written in a white, elegant cursive script.

for you
